

### **Application Requesting Approval for a Dock from ALMA**

ALMA must approve all docks and floats constructed or placed on the Lake. This applies to new docks and floats, as well as to changes to existing docks and floats beyond simple maintenance. A written description of the project must be submitted to ALMA. The DFW committee will review these proposals.

Please complete this page and a general sketch of the proposed dock showing its approximate location on the property.

1. *Send your completed application to:* ALMA, P.O. Box 3, Andover, CT 06232
2. Address and Owner of Property:
3. Description of the work to be completed:
4. What equipment is to be used?
5. Proximity of dock to septic system and leach fields:
6. Changes to shoreline/lake bottom as a function of installing the dock:
7. General description of location where the dock will be installed (flat, gently sloping, steep slope, grassy, sandy, boulders, vegetated etc.):
8. Is your proposed dock consistent with the "Materials" requirements provided in the detailed guidelines? If not, please describe.

In addition to ALMA's approval, any construction activity **involving excavations into the lake bed or shoreline for** docks, floats, or walls will require the applicant to communicate with and receive approval from the Andover Wetlands officer through the Andover town office. Approval from ALMA should be received before approaching the wetlands officer.
